About me

Data analyst with 3+ years of experience in database development, AI integration, and process optimization. Skilled in leading teams and building scalable data systems for public sector clients.

Work experience

Data analyst | Architectural Research Consultants | 01/08/2022 - Current | Albuquerque, United States

Designed and deployed the ARC UCAT (Utilization and Capacity Analysis Tool), transitioning the firm from Excel-based workflows to a virtual data environment leveraging CSV and MariaDB for dynamic visualization and analysis.

Serve as lead analyst for all utilization and capacity studies, overseeing project data, quality assurance, and reporting for statewide school district evaluations.

Independently manage and coordinate multiple concurrent projects, including delegating tasks and mentoring junior staff.

Developed NOVA, an in-house AI-powered system integrating language models to generate standardized facility narratives and enhance analytical efficiency.

Recognized for exceptional reliability, meeting all deadlines and maintaining clear communication across teams and stakeholders.
